- Note:** Codes that include NOS (not otherwise specified) or unspec. (unspecified) have alternative diagnosis codes that are more specific. These alternatives can be found in or near the section of ICD-9-CM that deals with the relevant three-digit codes. The 100 codes that are preceded by an arrow (▶) have been identified by the authors as especially common in family medicine. This list reflects changes that took effect Oct. 1, 2004. For more information about this year's ICD-9 changes, see "ICD-9 Changes: Update Now or Pay Later." Moore KJ. *Family Practice Management*. September 2004:17-18.
